FAMI-QS

Feed Additives and Premixtures

DQS MANAGEMENT SYSTEMS SOLUTIONS | 1500 MCCONNOR PARKWAY SUITE 400 | SCHAUMBURG, IL 60173 | 800-285-4476 | WWW.DQSUS.COM

The European System for Good Manufacturing Practice in Feed Safety requires organizations comply to the European Regulation 183:2005. FAMI-QS is designed to guarantee safety and good hygienic conditions throughout the food production chain.

The assessment gives manufacturers of feed components and suppliers from third world countries an opportunity to demonstrate the safety of their processes and conformity to the requirements.

If your organization manufactures feed additives and/or supplies components to the feed industry, you need to comply with FAMI-QS.

Benefits of FAMI-QS:

- Demonstrating the safety of your processes to the world

- Fulfilling the requirements if FAMI-QS and safeguarding corresponding markets

- Rise in customer and retailers confidence about the organization's ability to perform

- Integration of state-of-the-art procedures regarding hazard analysis, risk appraisal, and preventive strategies into the existing management system

- Increased product safety

- Reduced risk of product liability
